● DialTone Brand Kit

AI Voice Ordering for Restaurants

Version 1.0 — April 2026

About This Document

This brand kit defines the visual identity, voice, and design system for DialTone — an AI-powered voice ordering platform for restaurants, operated by ByteStreams LLC. It is the authoritative reference for anyone creating marketing materials, product interfaces, partner collateral, or communications on behalf of the DialTone brand. Domain: **dialtone.menu**

Contents

7. Imagery and Illustration Guidelines
8. Voice and Tone
9. Motion and Interaction

01 Brand Identity

Product Name	DialTone
Parent Company	ByteStreams LLC
Domain	dialtone.menu
Brand Voice	Warm, honest, craft-quality, approachable — like a trusted neighborhood restaurant that happens to use brilliant technology
Target Audience	Restaurant owners seeking AI-powered phone ordering; diners interacting with the voice agent and SMS flow

Brand Personality Traits

- **Warm** — Hospitality-first, inviting. Every interaction should feel like being welcomed into a great restaurant.
- **Trustworthy** — Transparent about AI, clear consent. We never hide the fact that technology is part of the experience.
- **Craft** — Editorial quality, attention to detail. Everything we produce should feel considered and intentional, like a well-designed menu.
- **Modern** — Cutting-edge AI under a timeless surface. The technology is advanced; the experience is familiar.

02 Color System

The DialTone color system is rooted in warmth and analog craft. It draws from the palette of artisan paper, printer’s ink, and the warm vermillion of a well-loved restaurant sign. Every color has been chosen to feel natural, honest, and inviting.

Primary Palette

Role	Name	Hex	RGB	Swatch	Usage
Primary / Accent	**Vermillion**	`#c8391a`	200, 57, 26		CTAs, links, accent elements, bullet markers
Ink	**Ink**	`#1a1410`	26, 20, 16		Primary text, headings, dark UI elements
Background	**Paper**	`#f5efe6`	245, 239, 230		Primary background, page canvas
Surface	**Paper Warm**	`#ebe3d5`	235, 227, 213		Cards, panels, summary boxes, code blocks
Secondary Text	**Muted**	`#6b5d4f`	107, 93, 79		Descriptions, labels, metadata, placeholders
Border	**Line**	`#2a211a`	42, 33, 26		Borders, dividers, rules, nav separators
Highlight	**Gold**	`#b89968`	184, 153, 104		Callout labels, highlights, hover accents, footer links

Extended Palette

Role	Name	Hex	Swatch	Usage
Vermillion Light	**Ember**	`#e04d2e`		Hover states on accent elements
Vermillion Dark	**Brick**	`#a52e14`		Active/pressed states
Paper Light	**Linen**	`#faf7f2`		Alternate light background
Paper Dark	**Parchment**	`#ddd4c4`		Deeper surface, heavier cards
Gold Light	**Wheat**	`#d4b888`		Lighter highlight accents
Gold Dark	**Bronze**	`#967a4e`		Darker highlight, emphasis

Semantic Colors

Role	Hex	Swatch	Usage
Success	`#3d7a47`		Confirmations, order-ready states — earthy green
Warning	`#c8871a`		Caution states — warm amber
Error	`#c8391a`		Errors, destructive actions — same as Vermillion
Info	`#4a6fa5`		Informational callouts — dusty blue

Dark Mode (Callout / Inverted Blocks)

When using dark backgrounds — such as footers, callout blocks, or the navigation bar — use the following inverted color mappings.

Role	Name	Hex	Swatch	Usage
Background	**Ink**	`#1a1410`		Dark callout blocks, footer
Text	**Paper**	`#f5efe6`		Text on dark backgrounds (opacity 0.55 for secondary)
Label	**Gold**	`#b89968`		Callout labels, uppercase headers on dark
Accent	**Vermillion**	`#c8391a`		Accent in dark context

03 Typography

DialTone's typographic system pairs the editorial warmth of **Fraunces** (a variable old-style serif) with the clean utility of **Instrument Sans** and the technical precision of **JetBrains Mono**. The result is a system that feels like a beautifully typeset menu — inviting, readable, and considered.

Font Stack

Role	Font Family	Weight	Fallback
Display	**Fraunces**	400 Regular	Georgia, 'Times New Roman', serif
Display Italic	**Fraunces**	500 Medium Italic	Georgia, serif
Display Bold	**Fraunces**	700 Bold	Georgia, serif
Heading	**Fraunces**	500 Medium	Georgia, serif
Body	**Instrument Sans**	400 Regular	'Segoe UI', -apple-system, sans-serif
Body Bold	**Instrument Sans**	600 Semi	'Segoe UI', -apple-system, sans-serif

Role	Font Family	Weight	Fallback
Code / Meta	**JetBrains Mono**	400 Regular	‘Fira Code’, Consolas, monospace
Code Bold	**JetBrains Mono**	500 Medium	‘Fira Code’, Consolas, monospace

Type Scale

Base size: 16px (1rem)

Level	Size	Line Height	Letter Spacing	Font	Usage
H1	clamp(2.2rem, 4.5vw, 3.5rem)	1.05	-0.03em	Fraunces 400	Page titles — elegant, light weight
H2	1.7rem	1.3	-0.02em	Fraunces 500	Section headers with numbered labels
H3	1.15rem	1.4	-0.01em	Fraunces 500	Subsection headers
Eyebrow	0.72rem	1.4	0.22em	JetBrains Mono uppercase	Category labels above titles
Body	0.98rem	1.6	0	Instrument Sans 400	Paragraph text
Nav Meta	0.72rem	1.4	0.15em	JetBrains Mono uppercase	Navigation metadata
Doc Meta	0.78rem	1.4	0.1em	JetBrains Mono uppercase	Document metadata lines
Code	0.88em	1.5	0	JetBrains Mono 400	Inline code, keyword callouts
Table Header	0.72rem	1.4	0.15em	JetBrains Mono	Column headers in

Level	Size	Line Height	Letter Spacing	Font	Usage
				uppercase	tables
Table Cell	0.92rem	1.5	0	Instrument Sans 400	Table body text

Typography Design Patterns

- **H1 weight:** Fraunces at regular weight (400) for an elegant, editorial feel — NOT bold
- **H1 italic emphasis:** Italic words within H1 use Fraunces italic in Vermillion (`#c8391a`) for emphasis
- **Eyebrow labels:** Always JetBrains Mono, uppercase, letterspaced, in Vermillion
- **Section numbers:** (01, 02, etc.) rendered in JetBrains Mono in Vermillion, inline before H2 text
- **Metadata lines:** JetBrains Mono, uppercase, in Muted color (`#6b5d4f`)

Design Note

The deliberate use of light-weight Fraunces for display titles creates a striking contrast with the bold, utilitarian body text. This mirrors the editorial tradition of high-quality restaurant menus and broadsheet newspapers, where the headline invites you in and the body text delivers the substance.

04 Spacing and Layout

Spacing Scale

Token	Value	Usage
xs	4px	Inline gaps
sm	8px	Tight element spacing
md	16px (1rem)	Default padding, list indents
lg	24px (1.5rem)	Component padding, content gaps
xl	32px (2rem)	Section separation
2xl	48px (3rem)	Major section padding
3xl	64px (4rem)	Page header padding

Border Radius

Token	Value	Usage
none	0px	Most elements — sharp, editorial feel
sm	2px	Inline code, subtle rounding
md	4px	Rare — buttons if needed

Layout Dimensions

Property	Value
Max content width	820px
Nav max width	1240px
Container padding	0 1.5rem
Layout model	Single-column editorial — no sidebar

05 Component Patterns

The following component specifications define the visual language of DialTone's interface and marketing materials. Each component is designed to reinforce the warm, editorial aesthetic while maintaining functional clarity.

Summary Box

Property	Value
Background	Paper Warm — `#ebe3d5`
Left border	3px solid Vermillion — `#c8391a`
Padding	1.5rem 1.75rem
Purpose	Key information callouts at the top of sections

Example:

> **Key takeaway:** DialTone answers every call, so your kitchen never misses an order — even during the dinner rush.

Dark Callout

Property	Value
Background	Ink — `#1a1410`
Text color	Paper — `#f5efe6`
Label	Gold (`#b89968`), Instrument Sans 600, 0.78rem, uppercase, letter-spacing 0.18em

Property	Value
Body font	JetBrains Mono 400, 0.87rem, line-height 1.6
Purpose	Script excerpts, legal language, important quotes

Example:

Sample Voice Script

```
"Hi, thanks for calling Marco's Pizzeria! I'm the AI ordering
assistant. I can help you place an order or answer questions
about the menu. Would you like to get started?"
```

Tables

- **Width:** Full width, border-collapse
- **Header:** JetBrains Mono, 0.72rem, uppercase, letterspaced, Muted color (`#6b5d4f`), 2px solid Line bottom border
- **Cell padding:** 0.75rem 1rem
- **Cell border:** 1px solid rgba(26, 20, 16, 0.15) bottom border only
- **Body font:** 0.92rem Instrument Sans

Navigation

- **Logo:** Fraunces 700, 1.35rem, with a Vermillion bullet (●) before the brand name
- **Right-side meta:** JetBrains Mono, 0.72rem, uppercase, Muted color (`#6b5d4f`)
- **Bottom border:** 1px solid Line (`#2a211a`)

Footer

- **Background:** Ink — `#1a1410`
- **Text:** Paper at 55% opacity
- **Links:** Paper at 80% opacity, hover transitions to Gold (`#b89968`)
- **Font:** JetBrains Mono, 0.72rem, letterspaced

Links

- **Color:** Vermillion — `#c8391a`
- **Underline:** 1px, text-underline-offset 3px
- **Hover:** Color transitions to Ink (`#1a1410`)

List Markers

Unordered list markers use Vermillion color (`#c8391a`). This reinforces the accent color throughout content-heavy pages and creates visual rhythm in documentation.

06 Logo Usage Guidelines

Logo Construction

The DialTone logo is text-based, set in **Fraunces 700** with a **Vermillion bullet prefix** (●). The bullet is an integral part of the mark and must always appear with the wordmark.

● **DialTone**

Primary logo on Paper background

● **DialTone**

Reversed logo on Ink background

Clear Space and Sizing

Rule	Specification
Clear space	Minimum = cap height of the “D” on all sides
Minimum size (digital)	100px wide
Minimum size (print)	1 inch wide
Approved backgrounds	Paper (`#f5efe6`), white (`#ffffff`), Ink (`#1a1410` — use reversed colors)

Logo Don’ts

- Do not apply gradient fills to the logo or bullet
- Do not add drop shadows or outer glow effects
- Do not rotate or skew the logo
- Do not violate the minimum clear space
- Do not change the bullet color — it must always be Vermillion (`#c8391a`)
- Do not separate the bullet from the wordmark
- Do not place the logo on busy or low-contrast backgrounds

07 Imagery and Illustration Guidelines

Photography Direction

- **Warm, analog photography:** Restaurant interiors, food close-ups, hands preparing dishes. Images should feel lived-in and authentic, not sterile or staged.
- **Color grading:** Muted, warm tones — avoid oversaturated or cold-toned imagery. Think golden-hour light, amber highlights, deep shadows.
- **Editorial black-and-white:** Use for secondary contexts such as blog sidebar images, background textures, or historical references.

Illustration Style

- **Hand-drawn or woodcut-inspired:** Illustrations should feel artisan and crafted, never flat vector or corporate clip art.
- **Tech screenshots:** When featuring product UI or screenshots, wrap them in warm Paper-toned frames (`#f5efe6`) to integrate with the brand aesthetic.
- **Avoid:** Stock photography that feels generic, overly polished lifestyle imagery, or any imagery with cold/blue color casts.

> **Art Direction Principle**
>
> Every image should pass the “menu test” — would it feel at home on the wall of a well-loved neighborhood restaurant? If it feels like it belongs in a tech pitch deck, it’s wrong for DialTone.

08 Voice and Tone

DialTone’s brand voice is that of a knowledgeable host — someone who knows the menu inside and out, genuinely cares about the guest’s experience, and never talks

down to anyone. We are not a corporate brand; we are a trusted partner in hospitality.

Writing Principles

- **Write like a knowledgeable host, not a corporate brand.** Imagine explaining something to a restaurant owner over coffee, not presenting at a trade show.
- **Use contractions** (we'll, you're, it's) — approachable, not stuffy.
- **Lead with the human benefit, explain the tech second.** Not "our NLP engine processes orders" but "every call gets answered, even during the dinner rush."
- **Respect the diner:** Be transparent about AI, consent, and data. Never obscure that the ordering experience involves AI.
- **For restaurants:** Speak to their craft and passion. Position technology as their sous-chef — essential, capable, but always supporting the chef's vision.

Tone Examples

Context	Do	Don't
Marketing headline	"Every call answered. Every order right."	"Leverage AI-powered NLP for omnichannel order optimization."
Error message	"Sorry, I didn't catch that. Could you say it one more time?"	"Error: Speech recognition failure. Input not recognized."
Restaurant pitch	"Think of us as your most reliable employee — one who never calls in sick."	"Our platform delivers 99.9% uptime SLA with enterprise-grade reliability."
AI disclosure	"I'm the AI ordering assistant for Marco's Pizzeria."	(No disclosure — implying it's a human)

09 Motion and Interaction

Motion in DialTone interfaces should feel subtle and intentional — never flashy or distracting. Transitions exist to provide feedback and continuity, not to showcase animation. The motion language mirrors the brand: warm, measured, and confident.

Property	Duration	Easing	Usage
Micro	150ms	ease-out	Hover color transitions, focus rings
Standard	250ms	ease-in-out	Link underline transitions
Page	350ms	ease	Page-level transitions

Accessibility Note

All motion must respect the `prefers-reduced-motion` media query. When reduced motion is preferred, transitions should be instant (0ms) or replaced with opacity fades only.
